SECTION II: SHORT ANSWER QUESTION

(40 MARKS)

1. Answer the following questions as instructed
- Match the following actions by the psychiatrist with the most appropriate ethics term (each word may be used once, more than once, or not at all):
 - The psychiatrist arranges to speak with a patient alone during the clinical interview. **(Marks 2)**
 - The psychiatrists respect the patient's preference not to be admitted to the hospital. **(Marks 2)**
 - The psychiatrist recommends diagnostic tests to occur at the time of the emergency evaluation. **(Marks 2)**
 - The psychiatrists sits with the patient's boyfriend to offer emotional support and "a listening ear" after the clinical interview with the patient is completed **(Marks 2)**
 - The psychiatrist documents accurately in the electronic medical record the full set of concerns raised by the patient and her boyfriend. **(Marks 2)**

[Autonomy, Beneficence, Compassion, Confidentiality, Justice, Non-maleficence, Respect for the law, Veracity]

- b. List down 5 ways law and ethics relate to each other and discuss life scenarios that can arise in each. (Marks 10)**

2. An 18-year-old male previously diagnosed with bipolar disorder brought by his best friend to the emergency department of a rural hospital near his grandparents' house. The best friend reports that the patient "is completely wild—he just won't stop—he's going to kill himself on the slopes!" he confided in his friend that he has been having suicidal ideations for a long time and has attempted twice most recent a week ago and he is still having strong urges of harming himself. He also excessively uses Alcohol together with other substances and indulges in risky behaviours. The patient shows evidence of intoxication and is irritable but cooperative during the initial interview in the emergency department. His vitals are within normal limits and are stable. No abnormalities are found on physical examination.

The psychiatrist on call realizes that he has been managing his grandfather and wonders whether it would be ethically right to take him up as his patient as well. Though goes ahead to assess the patient recommends for all necessary investigations to be done and recommends for an involuntary admission, as the patient had declined admission.

From the information provided above:

- a) Highlight the 4 ethical codes that are in play in the above scenario. **(4 marks)**
- b) Should the psychiatrist have interviewed and assessed the patient at the ER. **(2Marks)**
- c) Should the psychiatrist continue to be the patient's doctor. Explain **(2 marks)**
- d) Comment about confidentiality in this case. **(2 Marks)**
- e) Outline the nine NAADAC Principles of the counseling profession **(10 marks)**
