**SECTION B (60 MARKS)*****Attempt Any THREE (3 Questions in This Section)***

12. As a Community Health Extension Worker in sub-county X, you have been tasked to receive and maintain the database on stock of essential drugs and supplies from Community Health Promoters under your supervision.
- a) Formulate a table with a sample of malaria treatment data that you would share with your Community Health Promoters to use for reporting. [10 Marks]
- b) Explain FIVE criteria used to identify the essential drugs for the treatment of malaria. [10 Marks]
13. Maternal, newborn born and child health remains a challenge in most of the developing countries. The introduction of mother and child booklets has enabled the integration of Maternal and Child Health (MCH) services where mother and infant pairs can be attended to in the same setting by the same health provider. This reduces missed opportunities for interventions for both the mother and infant.
- a) Outline FOUR factors associated with the mother's level of utilization of the mother and child booklet. [8 Marks]
- b) Explain FOUR areas of improvement in maternal, newborn, and child health that you would recommend to the government of the day to consider. [12 Marks]
14. The government of Kenya has recruited a new cohort of Community Health Promoters in your area of jurisdiction to support Primary Care Networks (PCNs). You have been tasked to conduct community health training and education for this new cohort.
- a) Explain SIX thematic areas in the Community Health Promoters Curriculum that you would train the cohort on. [12 Marks]
- b) Elaborate on FOUR training needs assessment tools you will use to develop the objectives for the above training. [8 Marks]
15. "Prevention is better than cure". Effective disease prevention and control in the community can only happen where there is a working community disease surveillance system. As a Community Health Assistant, you have been tasked to spearhead disease surveillance in community X.
- a) Explain FOUR functions of a community disease surveillance system. [8 Marks]
